OA Web Link List & Pattern Project

Hello OA community! I don't know how many of you are on the distribution list. My name is Ken, and I have been involved with OA off and on since the early '80s when I had my first chance encounter with one of Masahiro's first books in a Walden's book store. Since that time I have enjoyed this craft immensely, usually creating a different OA card each year as our family Christmas card, or creating cards here and there for birthdays, Valentines, for the dog to eat, just-for-the-fun-of-it, etc.

Over the years I had accumulated a lot of web links and electronic versions of OA patterns, along with a good number of books. Unfortunately, due to a series of unfortunate circumstances over time, I have lost a majority of those web links and electronic versions. I had a lightning strike, a series of system hard drive crashes, and all of my supposedly good backups have turned out to be corrupt for one reason or another.

So, I am in the process of trying to rebuild a new OA link list. Further below is a current list that I have put together of those sites that I think are of sufficient merit to be included in the list. From these sites I hope to start downloading a pattern library once again; a slow process that hopefully I will be able to start sometime in the near future.

Here is where I ask for your help, as follows:

- Rather than being a tad selfish, like I was in the past (I apologize for that), I want to make sure this time that this link list is shared with, added to, and supported by all of you in the OA community. Since I do not currently have a web site of my own I was thinking that maybe one of the more popular sites, such as Evermore, could host the "master" OA list.
- If you have, or know of a site that is not included in this list, then please let me know so that it can be checked out for worthiness to be included. My personal preference would be to include sites that have, or add, some unique characteristic to OA.
- If you have, or know of sites that contain downloadable patterns, then please let me know as I have a pattern library to rebuild. (Can you hear me crying over the loss of literally hundreds upon hundreds of patterns?) Perhaps on the master link list a designator could be added that would indicate if the site contained downloadable patterns.
- Here is a potential idea: A centralized OA pattern database to which any artist could contribute and share their patterns. Hopefully this would help to alleviate the problem of patterns being lost to the OA community over time.
- Here is a potential idea: Rather than strictly the use of this OA mailing list, what would be the possibility of establishing an online forum for OA discussions?

Thanks for taking time out to read through all of this. It is my desire to make sure that this craft, this artistic expression, known globally as origamic architecture (or kirigami / pop-ups / greeting card sculpture design / folding cut maps, or whatever else in whatever language), is encouraged to new generations of future paper crafters and does not slowly fade away. I will try to send out some future e-mails on such topics such as where / how to locate OA books, and paper

sculpture links and paper automata links (for those who may be interested in such as well).

Thanks again. Ken. (kneely@icdc.com) Enjoy.

Ken's (and now yours) Under Reconstruction OA Link List:

- Keep in mind that many sites have unfortunately been lost over time, due to various reasons. Backups of some of these lost sites are still available through the Internet Archive WayBackMachine ("<http://www.archive.org/web/web.php>"), and such are preceded below with an *.

- Some artists, such as Ingrid, may have multiple entries in this list. Keep in mind that this was part of my original list, so some entries were set up this way as a means of easy access to the given pages.

- For some sites, the OA content may not be immediately identifiable. Look around the given site. The search may be visually worth it.

- Lastly, to the best of my knowledge, these links are current. (IE: No bad links.) Please let me know if you encounter problems with any of the links.
